SUSTAINABLE DISPLAYS

SUSTAINABLE SOLUTIONS

Click or scan here to learn more!

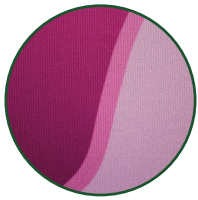

Here are examples of our ongoing efforts:

- Working to ensure adherence to our Supplier Code of Conduct throughout our supply chain
- Continually assessing product packaging options with the goal of minimizing environmental impact
- Our Ramsey, MN manufacturing facility leverages renewable energy to cover 50% of our energy use at that site
- Ensuring the availability of product options with a reduced environmental impact
- Continually assessing waste streams to identify recycling and landfill diversion options

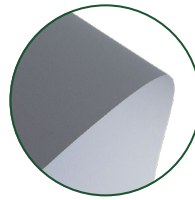

these pages are interactive!

Each product contains a hyperlink so you can quickly and easily learn more! **CLICK HERE** to be taken to our entire sustainable product lines.

RECYCLED POLYESTER

This 100% recycled media is made with fibers recycled from plastic bottles. Recycled bottles are collected worldwide, cleaned and flaked, and made into resin that can be made into fibers.

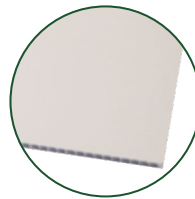

PVC-FREE MEDIA

Made from polyester, nylon and polyurethane. The benefits of PVC-free media include a reduction in toxic chemicals released into the environment, lower levels of VOCs (volatile organic compounds).

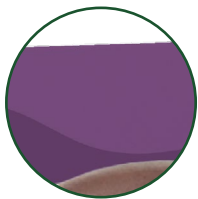

rPET POLYESTER / OXFORD CLOTH

rPET is plastic made by recycling used PET items like bottles and food containers. After being collected, they are processed into flakes or pellets that are used to make recycled media.

CORRUGATED PLASTIC

This corrugated plastic is made of 100% polypropylene and is 100% recyclable. Polypropylene is blue bin recyclable and falls under the #5 resin recyclability code.

3 MM PAPERBOARD

Made from cellulose-based printing paper and corrugated cardboard. Media is recyclable through a majority of curbside recycling programs.

OCEAN BOUND PLASTIC

Ocean bound plastic consists of repurposed plastic waste, such as bottles and packaging, before it reaches the ocean.
