

Jumbo Wide Retractor

Product Parts

- 1-Base
- 2-Banner Rail
- 3-Shock cord Pole (x2)

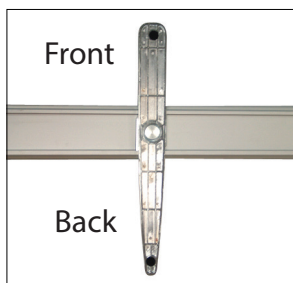

Display Set-Up

Step 1

Flip the Base (1) upside down and rotate the feet to sit perpendicular to the Base, with the narrow side of the feet turned to the backside of the retractor.

*** Incorrect positioning of the feet can cause retractor to be unstable.

Step 2

Assemble the shock cord portion of the Telescoping Poles (3) and insert them into the receptacle on the Base (1). Ensure the poles are seated completely into the bottom half-circle cutout.

Step 3

*** To ensure that the display does not twist, it is recommended that two people extend the banner from the base and hook the snap rail to the poles.

In tandem with another person, stand facing the back of the Base (1) and gently lift the Banner Rail (2) up. Gently tilt the base back if needed to attach the shock corded poles (3) top connectors into the rear groove on the Banner Rail where the 'insert' stickers are located.

Storage and Care

Place all product parts into Carry Case and store in a cool dry location.
To clean non-graphic hardware, wipe with a damp cloth
