Product Parts

1. Monitor Mount

Compatible with 3' Astra wall only
(Astra wall not included)

Max Monitor 50" / 18lbs
(Monitor not Included)

Graphic, Astra Wall &
other accessories
NOT included

Display Set-up

Step 1

Assemble half of your 3' Astra wall. Before putting the top half on, slide the Astra Monitor Mount (1) onto either side of the wall making sure the knob pieces of the Mount slide into the outside groove of the Astra wall.

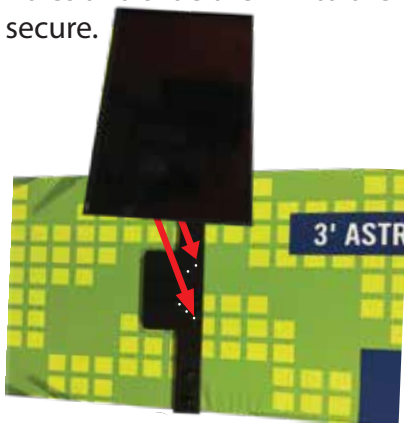

Turn and push tightening knobs to temporarily secure.

Step 3

Mount your monitor (not included) by first partially screwing your mounting screws (not included) into your monitor.

Then line up the mounting screws to the Monitor Mount Holes and slide them into the notch. Tighten to secure.

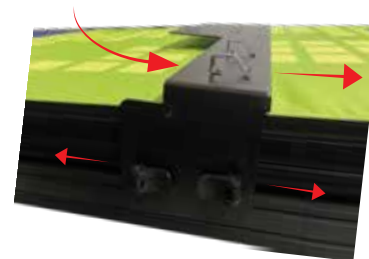

Step 2

Finish Assembling the Astra Wall then lay down the display on its front (so the Monitor Mount is against the floor) then install the back graphic.

Flip over the display (So Monitor Mount is face up) and begin installing the front graphic, weaving the graphic behind the monitor mount.

Monitor Mount can slide up or down along the groove to fully install graphic.

Step 4

Install Astra Wall feet and carefully stand the display up.
