

Car Flag

Product Parts

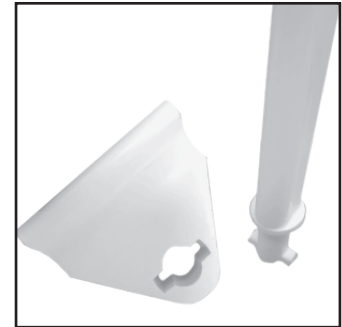

- 1 - Car Flag Pole with Window Clip
- 2 - Car Flag
- 3 - Zip-tie
(when ordered as a kit)

Display Set-Up

Step 1

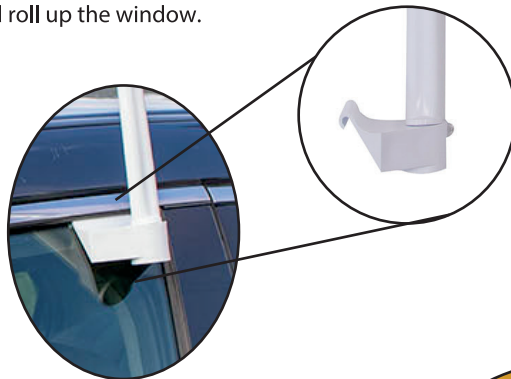

Car Flag Pole (1) should be attached to Window Clip by aligning tabs of Pole with opening on Clip and inserting fully. Turn a quarter of a turn clock-wise to lock in place.

Step 2

Car Flag Kit is recommended for a **maximum of 45 mph while in motion**. Adherence to this recommendation reduces risk of damage to Car Flag Kit and vehicle.

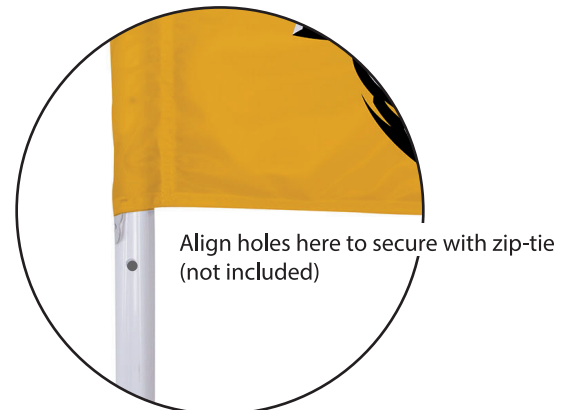

To attach, place the flagpole's clip on your window and roll up the window.

Step 3

For re-orders of a Car Flag (2): Attach Car Flag to pole by placing open end of flag pole pocket over top of pole (narrow end). Thread a zip-tie (not included) through pre-drilled hole on Car Flag Pole (1) and hole in leather tab at bottom of Car Flag (2). Drilling of pole may be required.

*If ordered as a Kit (Flag & Pole together), the Car Flag (2) will be preassembled to the Car Flag Pole (1).

Storage & Care

Store in cool dry location

Remove pole prior to washing. Machine wash cold, gentle cycle using mild detergent. Air dry only
